Mattoni per architettura
Architectural bricks

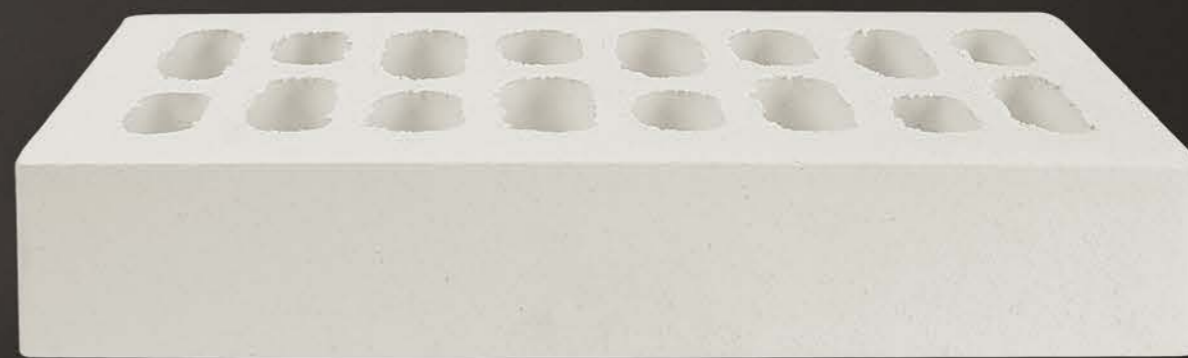

BLACK

Il muro realizzato con il mattone nero si configura come spazio architettonico che crea equilibrio organico all'ambiente. Eleganza e valorizzazione delle superfici murarie emergono dal colore e dalla posa con effetti di tratto orizzontale.

The wall made by black bricks is configured as an architectural space that creates organic environmental balance. Elegance and enhancement of the wall surfaces emerge from the color and from the installation executed by horizontal lines.

WHITE

Si propone colore e forma nel mattone bianco come sintesi della grammatica di progetto. Proporzioni raffinate e fluidità degli elementi architettonici sono il risultato del forte contributo dato dal colore.

The offer of color and shape in the white brick is a synthesis of the minimalist design concept. Refined proportions and smoothness of the architectural elements are the result of the strong contribution given by the color.

LE REALIZZAZIONI / THE PROJECTS

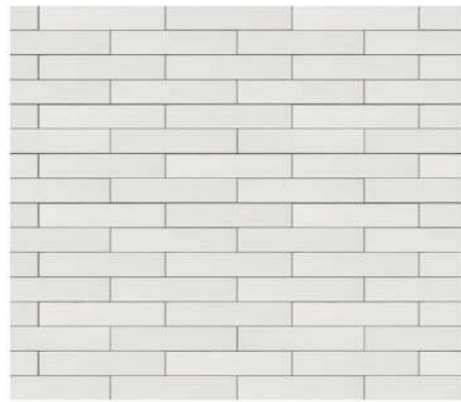

Il colore e la forma sono l'espressione raffinata di questi mattoni che come elementi fluidi consentono la valorizzazione delle masse murarie. La disposizione orizzontale marcata dal sistema di posa consente l'espressione organica delle linee e dei volumi.

The color and shape are the elegant expression of these bricks that, as fluid elements, allow the valorisation of the wall mass. The horizontal disposition emphasized by the laying system allows the organic expression of the lines and volumes.
